How do "flagged stops" work?

Hub Transit users may use designated stops or create flagged stops on the regular route to board and depart the bus.

When you want to flag the scheduled bus to stop, complete the following steps for a safe and efficient boarding:

1. Find a safe location along the route where visibility is clear and the bus can easily stop.
2. Stand on the side of the road on which the bus is traveling.
3. Wave at the bus driver to request a stop.
4. Wait for the bus to come to stop and board the bus!
